

1. Start before you start

Look at what you can do before the school year begins.

2. Fill in gaps

What are the missing pieces on your campus where you can help - and shine?

3. Have big goals

Prioritize three to five large-scale goals you can work on all year.

4. Don't forget your little goals

Understand that every day, you will have a million little jobs to do.

5. Realize you have the best job on campus

That should be pretty easy!
