OER in Higher Education: Current Status

OER Effort	OER Support
Core Curriculum Subjects	
<ul style="list-style-type: none">• Extensive OER development focusing on:<ul style="list-style-type: none">• High Impact indicated by number of students• Retention	<ul style="list-style-type: none">• State-wide grant support• Intra-mural grant of different levels• Encouragement with faculty Awards
Health Science Subjects	
<ul style="list-style-type: none">• Limited OER development.	<ul style="list-style-type: none">• Intra-mural grant of limited levels = TWU Minigrant: \$1,000

My Motivation to OER Projects

Pandemic and its impact	Textbooks in Market	Student's Situations
<ul style="list-style-type: none">• Lost jobs and income• Living conditions change• Concerns about future semesters  <p>PIX: https://app.us.lifeology.io/viewer/lifeology/lillytrialguide/what-is-covid-19</p>	<ul style="list-style-type: none">• Health Science textbooks often use many images and are expensive.• Many reputable textbooks are comprehensive, containing materials that we cannot cover in one semester.• Students often find textbooks not “student-friendly.”	<ul style="list-style-type: none">• Can't depend on others• Depression: more or less• Uncertain about future• Limited support• Limited \$\$ <div>BUT... They want to continue their studies at TWU.</div>

OER Project: Steps

Health Science OER Textbook Development

Step 1: Design the “Architecture”

- If you are developing an OER textbook for the course you are teaching, review your syllabus and the book you are currently using.
- Develop a skeletal structure of your book.

COMS 4623
Neural Foundations of Communication

Module 1: Introduction to Speech-Language Neurology
History of neurology
How do we learn about human brain?
Domain general vs. Domain specific
Brain mapping: Penfield and Brodmann's contributions.
Body orientations/planes

Module 2: Organization of Nervous system

- o Brain
 - Size
 - Weight
 - Development
 - Brain coverings (meninges)
- o Human vs. Brains of others
- o Foundation of nervous system
 - Divisions: CNS, PNS, ANS
 - Neurons vs. glial cells
 - Neurons vs. other cells
 - Myelin
 - RNA and DNA

Module 3: Neuronal functions in the nervous system

- o Gyri, Sulci
- o Major landmarks
- o Corpus Callosum
- o Four lobes and their structures/functions
- o Brodmann's areas
- o Broca's and Wernicke's areas; arcuate fasciculus
- o Pyramidal, extrapyramidal, and cerebellar system
- o Subcortical structures
 - Hippocampus
 - Amygdala
 - Basal ganglia (in detail)
 - Thalamus
 - Hypothalamus
 - Limbic system
- o Cerebellum
 - Diadochokinetic speech test

Module 4: Sensory organizations of speech and hearing

- o Afferent pathways
- o Special senses
- o General senses
- o Multi-sensory integration
- o Somatosensory system

Module 5: Motor control of speech

- o Efferent pathways
- o Somatomotor system
- o Sensory system's contribution to our movements.
- o Four elements of movements
- o Peripheral Motor ending
- o Motor integration: from intention to effect
- o Reflex activity

Module 6: The cranial nerves

- o Upper/lower neurons
- o Cranial nerves: directly related to speech/language
- o CN I, CN II-III-IV-VI, CN V: talk about the muscles under these CN's control
- o CN V, VII, VIII, IX, X, XI, XII
- o Auditory system review
- o Agnosia

Module 7: Autonomic nervous system

- o Sympathetic and parasympathetic divisions
- o Contrast ANS and somatic nervous system

Module 8: Motor Speech Disorders

- o Dysarthrias (subtypes and lesion sites)
- o Apraxia of Speech

Module 9: Central Language mechanism and learning

- o Neocortex and review on our knowledge of neurons
- o Neuroanatomy of language
- o Circuits and models for language and its disorders
- o Right hemisphere and its damage
- o Stem cells
- o Alteration of brain by invasive and non-invasive methods
 - Restorative and substitutive SLP approaches

Module 10: Adult disorders of language

- o CVA (stroke) and its impact to life and society
 - Aneurysm
 - Types of strokes
- o Aphasia
 - subtypes
- o Neurocognitive disorders
 - Alzheimer's disease
 - Frontotemporal dementia (language and behavioral types)
 - Vascular dementia
 - Dementia with Lewy bodies and Parkinson's dementia
 - Other cases
- o Minor Neurocognitive Disorder: Mild Cognitive Impairment (MCI)
- o Traumatic brain injury

Module 11: The developing brain

- o Development of the Nervous System: Overview (neural plate to neural tube; and to five encephalons) (OpenStax A/P: pp. 551 and 1335)
 - Anencephaly
 - Spina Bifida

- o Development of the Nervous System: Seven steps
- o Postnatal development of the brain
 - Communication and motor function: development phases
- o Primitive reflex: types and future development
- o Various syndromes and their effects

Module 12: Pediatric clinical speech disorders

- o Diagnosis of neurogenic disorders with primitive reflex
- o Oral and pharyngeal reflex
- o Relations between reflexes, brain development, and speech development
- o Cerebral palsy
- o Childhood Suprabulbar paresis
- o Muscular dystrophy

Module 13: Pediatric disorders of language

- o Bilingualism vs. disorders
- o Pediatric stroke and tumor
 - Sickle cell disease
 - Landau-Kleffner Syndrome
- o Attention Deficit Hyperactivity Disorder (ADHD)
- o Specific Language Impairment
- o Down Syndrome
- o Williams Syndrome
- o Fetal Alcohol Syndrome (FAS)/Prenatal Exposure to Alcohol (PEA)
- o Autism Spectrum disorder
- o Developmental dyslexia

- Size
- Weight
- Development
- Brain coverings (meninges)
- Human vs. Brains of others
- Foundation of nervous system
 - Divisions: CNS, PNS, ANS
 - Neurons vs. glial cells
 - Neurons vs. other cells
 - Myelin
 - RNA and DNA

Module 3: Neuronal functions in the nervous system

- Gyri, Sulci
- Major landmarks
- Corpus Callosum
- Four lobes and their structures/functions
- Brodmann's areas
- Broca's and Wernicke's areas; arcuate fasciculus
- Pyramidal, extrapyramidal, and cerebellar system
- Subcortical structures
 - Hippocampus
 - Amygdala
 - Basal ganglia (in detail)
 - Thalamus
 - Hypothalamus
 - Limbic system
- Cerebellum
 - Diadochokinetic speech test

Health Science OER Textbook Development

Step 2: Define the Team Member(s)

- Decide whether you want to work on the OER project alone or form a team.
- If you decide to work with co-authors or collaborators, define each person's role before approaching others.

**Let's find accountable
and reliable
team members**

Health Science OER Textbook Development

Step 3 – 1/3: Find OER Materials to Utilize

- Search for the resources: existing OER books and other open resource materials that allow “remix.”
- **EXAMPLES**: Openstax, U.S. government-issued information, etc.

openstax™ Access. The future of education.

<https://openstax.org/>

Peer-reviewed. Openly licensed. 100% free.

And backed by additional learning resources. Review our OpenStax textbooks and decide if they are right for your course. Simple to adopt, free to use. We make it easy to improve student access to higher education.

Health Science OER Textbook Development

Step 3 – 2/3: Review Creative Common Licenses

 BY	Attribution Others can copy, distribute, perform and remix your work if they credit your name as specified by you.
 ND	No Derivative Works Others can only copy, distribute, or perform verbatim copies of your work.
 SA	Share Alike Others can distribute your work only under a license identical to the one you have chosen for your work.
 NC	Non-Commercial Others can copy, distribute, display, perform or remix your work but for non-commercial purposes only.

	Attribution CC BY
	Attribution-ShareAlike CC BY-SA
	Attribution-NonCommercial CC BY-NC
	Attribution-NoDerivatives CC BY-ND
	Attribution-NonCommercial-ShareAlike CC BY-NC-SA
	Attribution-NonCommercial-NoDerivatives CC BY-NC-ND

Health Science OER Textbook Development

Step 3 – 3/3: Review Creative Common Licenses

CC0, as known as “cc Zero” is Creative common’s sign for public dedication. others may freely build upon, enhance and reuse the works for any purposes without restriction under copyright or database law.

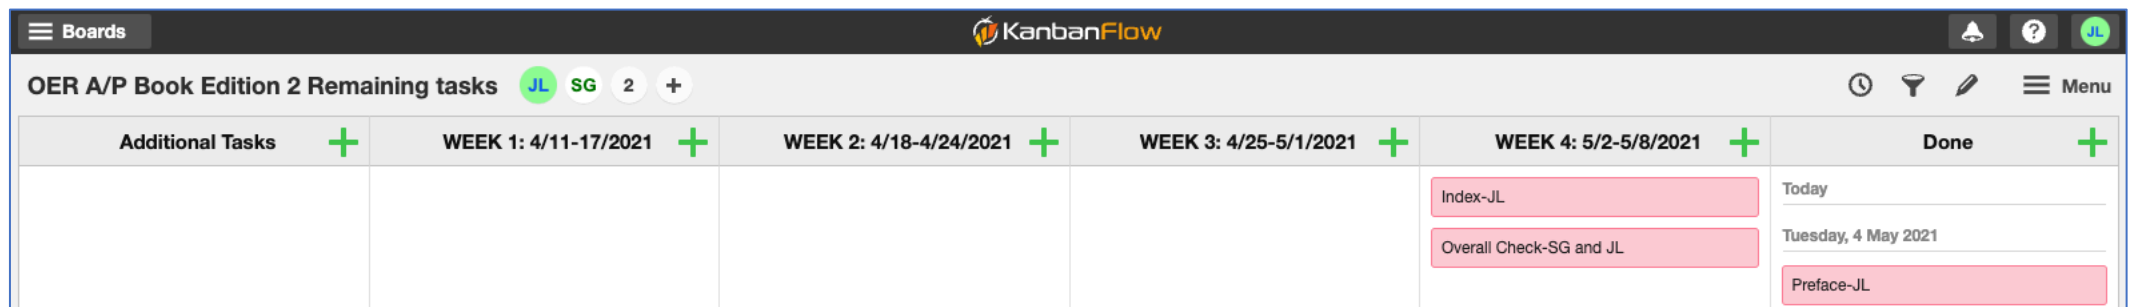

Public Domain Mark (PDM). Free of known copyright restrictions, and public domain. The Public Domain Mark indicates that the marked material is free of known copyright around the world.

Health Science OER Textbook Development

Step 4: Project Timeline

- Estimate:
 - The areas you can utilize OER materials of others and remix them for your needs
 - The areas you need to write up
 - The scope of tasks to organize your original and other OER materials and integrate them.
- Make a project timeline:
 - You can make your project management system, or

The screenshot displays a KanbanFlow project management interface. The top header shows 'Boards' and the 'KanbanFlow' logo. The main board is titled 'OER A/P Book Edition 2 Remaining tasks' and includes a filter for 'JL' and a count of '2' tasks. The board is organized into columns representing different stages of the project timeline:

Additional Tasks	WEEK 1: 4/11-17/2021	WEEK 2: 4/18-4/24/2021	WEEK 3: 4/25-5/1/2021	WEEK 4: 5/2-5/8/2021	Done
				Index-JL Overall Check-SG and JL	Today Tuesday, 4 May 2021 Preface-JL

Health Science OER Textbook Development

Step 5: Establish Reviewers and Review Process

- Find a review protocol or rubric you would use for your book.

EXAMPLE: CRAAP Criteria

- ✓ **C**urrency,
 - ✓ **R**elevance,
 - ✓ **A**uthority,
 - ✓ **A**ccuracy, and
 - ✓ **P**urpose
- Communicate with potential reviewers and ask to review.

OER Evaluation Criteria Adopted from CRAAP (currency, relevance, authority, accuracy, and purpose) June Levitt (jlevitt@twu.edu)			
Evaluation of:			
Item	10-point Likert Scale: Rating guidelines; rate 10=highest to 0=lowest if no instruction is provided.	Rating	NOTES
CURRENCY: Timeliness			
Initial Publication Date	10=this year; 9-last year; and deduct 1 point as the year goes back		
Last update: Date	10=this year; 9-last year; and deduct 1 point as the year goes back		
Information Current? (rate 0 to 10)	10=most current and updated; 0=dated		
hyperlinks	10=all the links work; 0=links do not work		
RELEVANCE: Topics on Target?			
Topics are focused on the study			
Topics are geared to the target level of students			
Topics are relevant and related to the subject			
Topics go along with the modules on the syllabus			
AUTHORITY: Reliability of the Information			
Quality: Author, publisher, resource, and sponsor			
Contact information: clarified and accessible?			
ACCURACY: Format and Content			
Reference: cited properly?			
Reference: reliable?			
Format reviewed?			
Content reviewed?			
Spelling, grammar, or other typographical errors?			
PURPOSE: The Reason the information Exists			
Purpose of the OER material: clarified?			
Author's intention: clarified?			
Is the content objective without any biases?			
TOTAL			
COMMENTS			

Health Science OER Textbook Development

Step 6: OER Textbook Creation

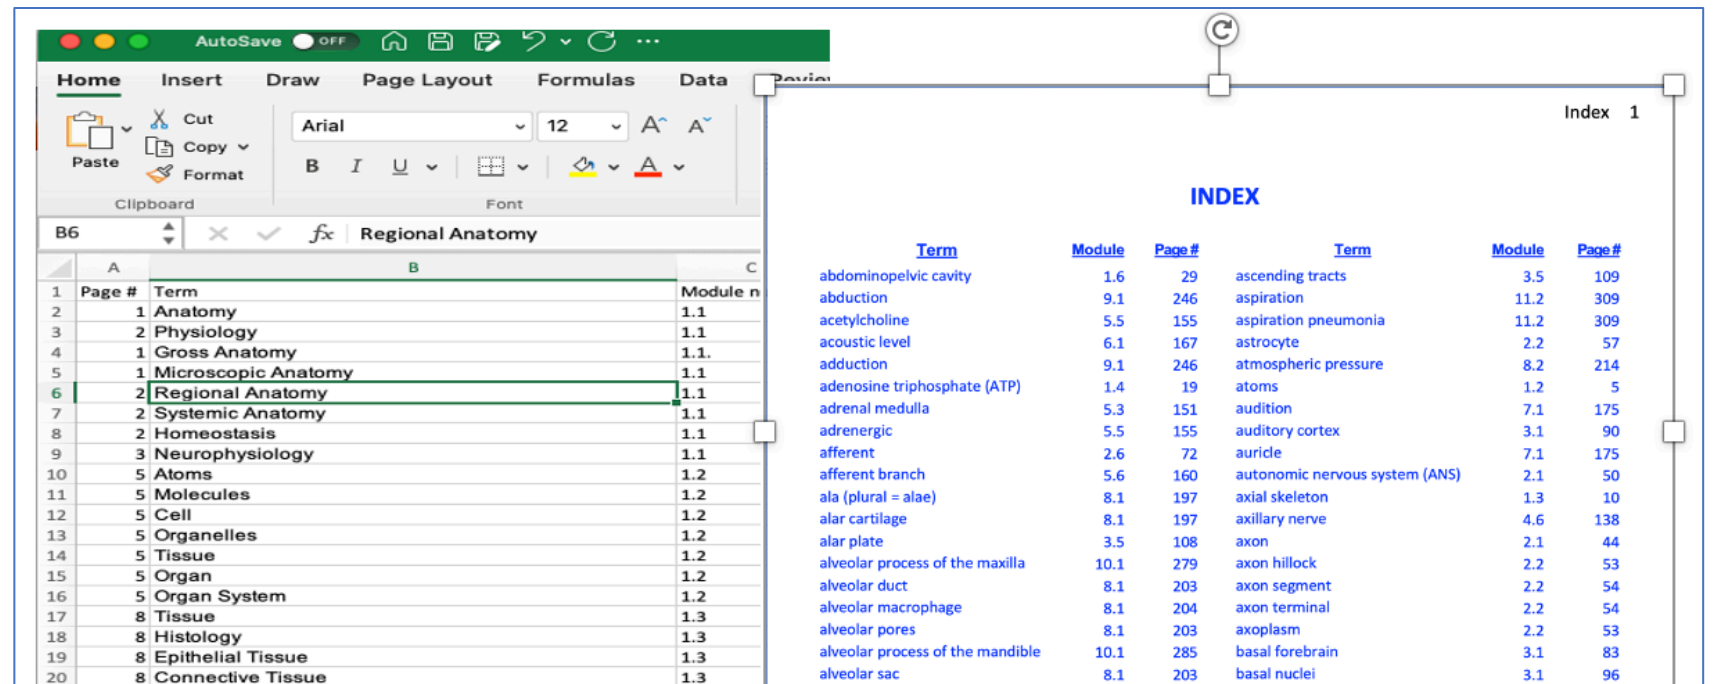

PIX: <https://edwinweitenberg.com/typing>

- Write the book with proper citations.
- When you utilize parts from the OER materials of others, know the format you need to cite.
EXAMPLE: OpenStax instructs us to cite the specific areas on every page of your book.
- Edit. If you have co-authors or collaborators, exchange the assigned parts and edit each part. If you are a single author, ask your colleagues to read your work and edit it.

Health Science OER Textbook Development

Step 7: Integration and Touchup

- Integrate the modules into one cohesive book.
- Create an index → Excel is a handy tool to make an index.
- **[Optional]** hyperlink the modules on your table of contents to the actual pages.

The screenshot shows an Excel spreadsheet with two main sections: a Table of Contents (left) and an Index (right).

Table of Contents (Left):

Page #	Term	Module #
1	Anatomy	1.1
2	Physiology	1.1
3	Gross Anatomy	1.1
4	Microscopic Anatomy	1.1
5	Regional Anatomy	1.1
6	Systemic Anatomy	1.1
7	Homeostasis	1.1
8	Neurophysiology	1.1
9	Atoms	1.2
10	Molecules	1.2
11	Cell	1.2
12	Organelles	1.2
13	Tissue	1.2
14	Organ	1.2
15	Organ System	1.2
16	Tissue	1.3
17	Histology	1.3
18	Epithelial Tissue	1.3
19	Connective Tissue	1.3

Index (Right):

Term	Module	Page #	Term	Module	Page #
abdominopelvic cavity	1.6	29	ascending tracts	3.5	109
abduction	9.1	246	aspiration	11.2	309
acetylcholine	5.5	155	aspiration pneumonia	11.2	309
acoustic level	6.1	167	astrocyte	2.2	57
adduction	9.1	246	atmospheric pressure	8.2	214
adenosine triphosphate (ATP)	1.4	19	atoms	1.2	5
adrenal medulla	5.3	151	audition	7.1	175
adrenergic	5.5	155	auditory cortex	3.1	90
afferent	2.6	72	auricle	7.1	175
afferent branch	5.6	160	autonomic nervous system (ANS)	2.1	50
ala (plural = alae)	8.1	197	axial skeleton	1.3	10
alar cartilage	8.1	197	axillary nerve	4.6	138
alar plate	3.5	108	axon	2.1	44
alveolar process of the maxilla	10.1	279	axon hillock	2.2	53
alveolar duct	8.1	203	axon segment	2.2	54
alveolar macrophage	8.1	204	axon terminal	2.2	54
alveolar pores	8.1	203	axoplasm	2.2	53
alveolar process of the mandible	10.1	285	basal forebrain	3.1	83
alveolar sac	8.1	203	basal nuclei	3.1	96

Health Science OER Textbook Development

Step 8: Make OER Textbook Available

Options:

- Contain in CANVAS or Google Drive folder
- TWU's library system
- External digital libraries
 - OER Commons (national level)
 - OER Texas (state level)

Step 9: Continuous Surveys and Refinements

- Conduct surveys to learn how your OER book is received.

Responses I received:

- Easy to follow because it goes along with the course sequence.
 - Target is clear.
 - Dr. Levitt's lecture comes back to me when I read the book for review.
- Ask students to offer comments to improve your OER books.

Responses I received:

- Want review questions with answers → I implemented it.
 - Want more glossary of terms at the end of each module → in progress...
 - I found a typo.... → I revise as needed.
- Keep refining your OER materials in future editions.

My OER Experience...

Introduction to Anatomy and Physiology for Communication Sciences: Edition 2

Use: **132 students** over three semesters

Savings: **\$33,231.00**

\$251.75 (previous textbook) x 132 (# of students)

Rating: **9.03 (STDV: 1.12)**

by Students: 10-point Likert Scale: 9.03

This book is accessible in two OER libraries:

OERTX

https://oertx.highered.texas.gov/courses/introduction-to-ap-for-comsci-edition-2-may-2021-cc-by_nc-pdf

OER Commons

https://www.oercommons.org/courses/introduction-to-ap-for-comsci-edition-2-may-2021-cc-by_nc-pdf

Neural Foundation of Communication: Edition 1.2

2022 Spring Semester is the first time to use it 100%.

The screenshot shows the Open Educational Resources Commons interface. At the top is a dark navigation bar with the OER Commons logo and links for Discover, Hubs, Groups, and Our Services. A green 'Add OER' button is on the right. Below the navigation bar, the resource title 'Neural Foundations of Communication Edition 1-2_1228-2021-CC-BY_NC.pdf' is displayed in blue, followed by a five-star rating. Action buttons for 'View Resource', 'Save', and 'Edit' are present. On the left, there are icons for views (13), downloads (1), and comments (0). A yellow callout box with a red border and a red arrow points to the 'Endorsements' section, which features the Open Illinois logo and name.

Description

Overview: Preface

Neural Foundations of Communication was developed for undergraduate neurology classes in the study of communication sciences and disorders. Anatomy and Physiology is a prerequisite to gain an understanding of neurology as it relates to communication. As such, this book contains some of the foundational information from the anatomy textbook, "Introduction to Anatomy and Physiology for Communication Sciences" for review.

The authors intended to cover the coursework with this textbook to customize the sequence of learning objectives

Endorsements

Open Illinois

Neural Pathways of Communication: Edition 1

2022 Fall Semester will be the first time to use it 100%.

The screenshot shows the Open Educational Resources Commons interface. At the top, the header includes the OER Commons logo, navigation links (Discover, Hubs, Groups, Our Services), an 'Add OER' button, and search, notification, and user profile icons. The main content area displays the title 'Neural Pathways of Communication Edition 1-0807-2021-CC-BY_NC.pdf' with a 5-star rating. Below the title are buttons for 'View Resource', 'Save', and 'Edit'. A statistics bar shows 204 views, 3 downloads, and 0 comments. A red arrow points from a yellow callout box to the '204' view count. The callout box contains text about the book's use in the Fall 2021 and Fall 2022 semesters. Below the statistics, the 'Description' section is partially visible, starting with 'Overview: Preface' and a paragraph about the book's development in 2020 to support rising Speech-Language Pathologists (SLPs).

204 views. My TWU colleagues and I used this book partially during the Fall 2021 semester, with a total of 160 students for the first time. I will fully use it in the Fall 2022 semester.

Description
Overview: Preface

Neural Pathways of Communication is a master's level graduate study of... was developed in 2020, shortly after rising Speech-Language Pathologists (SLPs) progress toward their licensure and certification without interruptions due to financial setbacks. Developing the Open Education Resource (OER) resources is our ongoing effort to support rising SLPs.

Other development

- I introduced my OER books in the Higher Education Special Interest group of the **American Speech-Language-Hearing Association**, and received...
 - Offer to review my future editions from a reputable scholar, and
 - Offers to collaborate in future OER development from some others.
- Found another colleague in a different university who wrote a workbook in my area and connected, and
- One of the UTD professors made my OER textbook links available on his website for his students.

PIX: <https://www.deafumbrella.com/post/thumbs-up-a-historical-mistake>

Challenges

- Find “gold” in the sand: Searching for the information I need for my field.
- Develop the "workbook" component relevant to my field.
- Examine the reliability of the materials to use.

Benefits

- Customized materials to go along with the lectures.
- Remix and rephrase information to make it “students friendly.”
- Two-way ownership: Students own the book with me for future refinement.

My Future OER Plans

GOAL 1: Make OER textbooks for all my science-related courses (not clinical courses).

**ACTION: Write two more OER textbooks.
(COMS 3333 and COMS 5233)**

GOAL 2: Develop topic-specific workbooks to enhance learning

ACTION: Neuroanatomy, Muscles, and Phonetics workbooks.

GOAL 3: Continue refining and revising my textbooks with new editions.

ACTION: Maintain my OER books up to date and evidence-based.

GOAL 4: Expand OER effort in the College of Health Science

ACTION: Promote, facilitate, encourage, and assist colleagues in getting started with OER.

Summary

Taken together....

- OER does not compete against commercially available textbooks.
- OER does not always need to be textbooks.
- There are many different resources that we can “remix.”
- OER development is the faculty’s contribution to teaching, scholarly, and service dimensions.
- TWU has resources in our OER toolbox.

Feel free to let me know if you want to start your OER. I will be happy to assist you.

Do you have any questions?

PIX: <https://www.animatedimages.org/img-animated-thank-you-image-0076-118619.htm>
