TEXAS STATE COLLEGE FOR WOMEN

DENTON, TEXAS

AUGUST 1941

I hereby recommend that the thesis prepared
under my supervision by CHARLOTTE CORNELL
entitled SURVEY OF GRADUATE ALUMNAE OF THE
TEXAS STATE COLLEGE FOR WOMEN, 1904 TO 1921

be accepted as fulfilling this part of the requirements
for the Degree of Master of Arts.

Evel S. Eppright
In Charge of Thesis

Evel S. Eppright
Director of Department

Accepted:

W. H. Park
Director, Graduate Division

ACKNOWLEDGMENT

The writer wishes to express her sincere appreciation to Dr. Ercel S. Eppright under whose direction the study has been made. She wishes to acknowledge her indebtedness to Dean E. V. White and to the two hundred and eighty-eight graduate alumnae who helped to make the study possible.

CHAPTER I

BRIEF HISTORY OF THE TEXAS STATE COLLEGE FOR WOMEN

The Texas State College for Women was established at Denton, Texas, by the legislature in 1901, and the first regular session opened on September 23, 1903, with fourteen members on the College faculty. Twelve years later the first bachelor's degree was conferred.

LOCATION OF THE COLLEGE

There are several reasons why the town of Denton was selected as the site for the College. It is situated in a beautiful agricultural region and is supplied with pure artesian water. At the time of the founding of the College, the town had electric lights, sewerage, and natural gas. Denton is approximately thirty-five miles from Fort Worth and from Dallas and is reached by the Missouri, Kansas and Texas, and the Texas and Pacific Railways. The population of about 5,000 cooperated with the various activities and ambitions of the College, and the town as a whole was favorably regarded by the legislative committees because of its moral and religious atmosphere, its culture and intellectual standards.

The College campus of seventy-three acres, at the beginning, occupied an attractive site. A twenty-five acre park with grassy slopes and large oak trees from end to end formed the approach to the main group of buildings. To the rear of the campus was the poultry yard, the College experimental garden,

field and orchard, and the wooded pastures for the dairy herd.

The College buildings, located near each other on the most elevated portion of the campus, were substantial, modern, attractive and well equipped. The Administration Building is still being used today. Additional buildings have been and are being built to accomodate the ever increasing College attendance.

The original campus of the College consisted of seventy-three acres. The original land was donated in 1902 by the citizens of Denton, which though a small town, raised the money for the purchase of this land by an agreement that each citizen would triple his property renditions for a period of one year. It is to their credit that no one of pledge group defaulted.

LAW CREATING THE COLLEGE

The purpose and scope of the "Texas Industrial Institute and College for the Education of White Girls of the State of Texas in the Arts and sciences" is set forth in the legislative act establishing the institution:

"Be it enacted by the Legislature of the State of Texas Section 5, That a first class industrial institute and college be built for the education of white girls in this State in the arts and sciences, at which such girls may acquire a literary education, together with a knowledge of kindergarten instruction--also a thorough knowledge of general needlework including dressmaking--also a thorough knowledge of scientific and practical cooking, including a chemical study of food--also a knowledge of practical housekeeping--also a knowledge of care and culture of children. . . ."

Enacted by 27th Legislature, April, 1901.

The following excerpts from an address of President Cree T. Work at laying of cornerstone, January 10, 1903, reveal the underlying philosophy of the founding of the College.

"The professions are being overstocked: we must prepare our people for higher living in the home, in the office, in the field, in the industries of the times In short we want to meet the need of our times in training women who will be competent, intelligent, and refined; well fitted for self support if this should be necessary, thoroughly prepared for woman's work in the industrial and commercial world if they so choose to labor; well trained for companionship with worthy manhood and for motherhood, when this is desired."

The law specified that the College was to be maintained for the education of the white girls of the State in the arts and sciences. The school was established as "a first class industrial institute and college," with courses that would enable young women to obtain an education in both literary and industrial subjects as well as such activities which would fit and prepare the young women of the State "for the practical industries of the age."

NAME OF THE COLLEGE

Girl's Industrial College was the first name selected but was changed by the Regents in 1905 to the "College of Industrial Arts." In 1906 bulletins carried the sub-title

"State College for Women." Though the maintenance of industrial, or technical, courses was emphasized in the law, the College provided "literary education" or "liberal arts courses" from its beginning. The institution today is a combined liberal arts and technical arts college.

DIPLOMAS, CERTIFICATES AND DEGREES

In the early years of the College, 1904-1909, the credentials granted were based on two years of general college work. These diplomas were not granted after 1909.¹

Beginning in 1910 and continuing up to and including 1920, the College granted three year college diplomas. In 1920 these diplomas were discontinued,² and all students received baccalaureate degrees in their chosen fields. The College began issuing bachelor's degrees in 1915.

The standarization of college courses and the recognition of the institution by the State Department of Education as a college of the first class was established in 1915-16. The change provided for sixty minute lecture periods, 120 minutes laboratory periods, and six daily sessions per week with each student taking five standard subjects. Legal recognition was given to the College in the issuance of the teachers' certificates with recognized college standards ascertained and observed.

¹Alumnae Directory 1903-04 to 1923-24, College Bulletin No. 110, T.S.C.W., Denton, Texas, July 1, 1924, p. 88.

²Ibid., p. 58.

Two year diplomas were granted from 1903-04 to the close of 1909, making a total of one hundred and fifty-six as shown below:

Year	Number of diplomas granted
1904	1
1905	9
1906	28
1907	27
1908	38
1909	53

A total of eight hundred and thirty diplomas, each representing three years of college work, were granted from 1910 to 1921:

Year	Number of diplomas granted
1910	4
1911	28
1912	41
1913	48
1914	74
1915	83
1916	87
1917	135
1918	133
1919	106
1920	91

Beginning in 1911 and continuing to 1925, the College recognized students who had completed certain groups of courses which were offered under vocational studies. Vocational certificates were given based on one, two, or three years of work. It is interesting to note the type of work which was given: commercial arts, domestic arts, fine and industrial arts, home-making, millinery, costume design, telegraphy, dressmaking, commercial advertising, linotype, photography, interior decoration, and painting.

Diplomas were granted in public school music and kindergarten training to those having completed two years of college work.

A total of fifteen hundred and seven credentials of lower rank than a degree with a great number of teachers' certificates of all grades and classes were issued. The degree groups began to develop in 1914-1915. There were three graduates the first year in which degrees were offered.

The enrollment became much larger in some departments; therefore, it was necessary to divide some of the departments, to consolidate two departments, or to make further reorganizations to meet the increasing enrollment.

CURRICULA OFFERED

At the inception of the College, there were fourteen members of the faculty, each the head of a department of instruction.

Industrial courses early predominated the curriculum under the designations "Home Economics," "Fine and Industrial Arts," and "Commercial Arts." The fourth curriculum was called the "English-Science Course." Although such practical subjects as cooking, sewing, dairying, landscaping, woodworking, drawing and designing were offered, the literary work ranked first in the subjects which were to be taught. Here, the girls not only received an industrial or technical education, but they also received a literary education at the same time. The first twelve years, all students, before they were permitted to

graduate, had to be able to make their graduation dress.

One of the original departments of instruction was the "Department of Biology." In this department physiology, bacteriology and other courses in health education were taught. In early years courses were offered in geology, geography and physical geography. Gradually, geology and geography were eliminated, and courses in botany, zoology and advanced work in biological science were offered.

In the "Department of Physical Science and Photography," chemistry and physics were given. In 1915-16 the department was changed to "Physical Science" and in 1920-21, chemistry became a separate department. Students who majored in home economics were required to take one year of chemistry. Later, a three year group of courses was added in foods and a third year of chemistry.

Courses in economics were given in the "Department of History and Economics" from 1903 to 1915. No formal courses in Sociology were offered at the beginning, but this field was developed out of the previously mentioned "Department of History and Economics" which in 1914-15 was called "History and Social Science," and in 1915-16 became "History and Sociology"; later, it was changed again to "History and Social Science."

English was the only liberal arts subject that has been required throughout as leading to a diploma or a degree. Even though the practical arts predominated the curriculum in the early days of the College, English was always stressed.

As to language courses other than English, one of the original departments in 1903-04 was that of "Modern Language and Latin," a title which in 1915-1916 was changed to "Language." Courses were offered in French, German, Latin, and Spanish. Although emphasis was placed upon industrial courses, there was always a deep interest in these subjects.

From 1903-06 a department was designated as "Fine and Industrial Arts." The department held the name of "Art" from 1910-11 to 1914-15 and "Fine and Applied Arts" from 1915-16 to 1918-19. A course in elementary designing and costume designing was required of students of home economics.

Originally the work of home economics was administered in two departments: "Domestic Art" from 1903-04 to 1915-16 was changed to "Textiles and Clothing" in 1916-17; (2) "Domestic Science" from 1903-04 to 1915-16 was changed to "Foods and Cookery" in 1916-17. The two departments were combined into "Household Arts" in 1920-21. From the beginning the course in home economics has been most popular in the College; originally, eighty-five percent of the students majored in home economics. The laboratories were the first in Texas for the teaching of cooking and sewing to white girls. On completion of the two year and later the three year course, the student was awarded a diploma with a major, either in clothing or in foods, which entitled her to teach these subjects.

Two one-year courses were given in this field. One of the popular courses known as the "Homemakers Course" was a one-year group given from 1910-11 to 1923. No formal admission

requirements were made since the course was designated either as preparation for marriage, or for the successful management of the home. Another one-year course called the "Vocational Course" prepared students for a vocation such as millinery and dressmaking.

"Mathematics" was one of the original departments organized in the College. One year of mathematics was prescribed from 1903-4 to 1907-08. College courses in this field became standardized in 1914-15.

"Psychology, Ethics, and Manual Training" was one department in 1903-04. In 1906-07, "Psychology and Ethics" was made a separate department. With the session of 1908-09, there was created a Department of "Education." In 1911-12, psychology and ethics were transferred to it, and the department became known as "Education, Psychology and Ethics," later known as "Education and Philosophy" and in 1916-17 as "Education." Student teaching has been provided by the College since the session of 1916-17. Kindergarten was established in 1917-18. A diploma was given for two years work in kindergarten education and in public school music to those having fulfilled the requirements prescribed by the Department of Education.

From 1903-04 to 1909-10, the courses in the speech arts were given with subjects such as "Elocution, Physical Culture, and Voice Music." In 1914-15, physical training was placed in a separate department and the old department became "Expression and Music." In 1915-16, music was entirely separated and was called "School of Music" and later known as "The Department of

Music." For many years the work in speech was limited to private lessons in "Elocution."

Department of "Rural Arts" has undergone many changes but only in name. Individual courses, such as landscaping, dairying, poultry, and floriculture, were offered in 1905-06.

Library facilities of the College were at first very meager. The original library containing four hundred and sixty volumes opened January 1, 1904. No system of cataloging was in use, no librarian in charge, and there was no reading room. The books were in the care of students and assistants who kept the room opened when they did not have to attend classes. It was not until 1915-16 that a full time librarian was employed.

During the years since the College opened its door to receive students, it has had three presidents. Each president together with his administration has sought to carry out the fundamental ideas of the founders of the College. They have not wanted the College to become either a second-rate trade school or an old line classical university. The educational structure is defined by the law which provided for "the establishment and maintenance of a first class industrial institution and college." An institute is an organization for the promotion of learning philosophy, art science, or the like, as a society. . . academy, college, technical school, etc. The term "industrial" added the manual and technical element. "College" refers to an institution of higher learning, usually, for instruction in the liberal arts and sciences, leading to the bachelor's degree, as distinguished from the graduate of

professional schools. It also suggests more advanced work than that leading to the bachelor's degree. The law also designated the term, "first class" as a standard which the College has always strived to maintain. The term "industrial," as applied to institutions of learning has also a technical meaning, as defined by the Texas State Department of Education prior to 1901, the year of the establishment of the Texas State College for Women.

It is evident then, that the founders and friends of the College had in mind that the Texas State College for Women, should be a college of the first class with standard requirements for admission and for graduation, as also a school of industrial and vocational training for those not working toward degrees.

Though it was intended that the College be an industrial institute, it was also meant that the girls of Texas could here receive a literary education. The founders realized that a literary education should form a basis for effective technical and special education. Subsequently, the College has added one after another of the various kinds of work specified in the law, as legislative appropriations, student enrollment, and needs of the women of the State, made it practicable. To keep up with the spirit and progress of the times, there were added, "such other practical industries as from time to time may be suggested by experience," so as to make it possible to take care of the increasing number of students. The College is today giving instruction and training in literary work of

the same quality as can be obtained in the best non-technical colleges of the first class.

During the thirty-eight years of its existence, the Texas State College for Women has expressed its belief that the best education a woman can have to prepare her for the practical industries of the age is an education based on a right combination of literary and industrial training. What would be a good combination for one student would probably not be the right combination for another, and therefore, it has sought to mold the curriculum to the needs of the individual. These are fundamentals in literary work and in the industrial work that every woman will profit from in her own life work of homemaking. The principal aim of the institute is an education that will fit the women for the practical industries of the age, that will produce the most valuable results when applied to the everyday life, and that will at the same time give mental hygiene, social culture, industrial efficiency, and spiritual vision and outlook.

The Texas State College for Women owes to every young woman who comes a literary and industrial education that stands the test and meets every demand of our dynamic civilization embodied in the democratic tradition of the self expression of the maximum of the individual's capabilities.

Thus, the Southwest and especially Texas, as compared with other states, does not lag behind in state endowed training of women. It is not the size of the College nor its equipment that distinguishes an educational institution, but the

dominating ideals which determine the policies pursued in shaping the lives and directing the minds of its students, and in subsequently molding the careers of its influential alumnae.

In this era of quick adaptations to the circumstances of our economic existence, the changing status of women and the reemphasized stress of democratic ideals in the face of attacks, the institution is forced indeed to be forward looking and anxious to take advantage of every new insight of proven worth.

CHAPTER II

DATA REGARDING TWO HUNDRED EIGHTY-EIGHT GRADUATE ALUMNAE

No study has been made of the early graduate alumnae of the Texas State College for Women. Since the writer herself is an alumnae of this period, she took special interest in collecting information about graduates of 1904 to 1921.

A questionnaire (See Appendix, pp. 57-61) was formulated and sent to seven hundred and forty-two graduates of the College. There were nine hundred and eighty-five who had completed the required courses in the period mentioned and had received their diplomas but due to incorrect addresses, only seven hundred and forty-two questionnaires could be sent out.

From this number, two hundred and eighty-eight, or 29.25 per cent, were returned in usable form. The correct addresses of these alumnae are given in Appendix on pages 62-75. Fifty-four additional questionnaires were returned for lack of correct addresses, and five were reported as deceased.

The percentage of returns from the classes varied from 18.42 per cent of the class of 1908 to 50 per cent for the class of 1910.

Mrs. Marilue Hicks Adair, who made a study of all College graduates over a later period of twenty years, received 51.1 per cent of questionnaires which were sent out.

TABLE I
RESPONSE TO QUESTIONNAIRES

Year	No. of Graduates	No. of Questionnaires Received	Percent
1904	1	0	0
1905	9	3	33.33
1906	28	8	28.57
1907	26	12	46.15
1908	38	7	18.42
1909	53	17	32.07
1910	4	2	50.00
1911	28	7	25.00
1912	41	12	29.26
1913	48	15	31.25
1914	74	18	24.32
1915	83	27	32.53
1916	87	25	28.73
1917	135	36	26.66
1918	133	36	27.06
1919	106	32	30.18
1920	91	31	34.06
Total	985	288	
Percent			29.25

The encouraging letters and notes which were included with the questionnaires indicate the appreciation of these early students of the education which they have received from

the Texas State College for Women.

In numerous ways it is reflected in their homemaking activities and other chosen fields in which they are working.

"I am glad to add my little to your collection. I feel all exes are sisters under the skin."

"My limited formal school going, augmented with much study of things concerning my varied interests, has made me a happy person."

"The influence the College had on my blank, inquiring mind cannot be measured by diplomas or degrees."

"I was sent to College but would probably have not been willing to have worked my way had it been necessary. But now, I can think of nothing more important that was ever done for me. I am able to earn a living in a very interesting and fairly remunerative way."

"I am quite proud of my contributions to society, four intelligent, ambitious children."

RESIDENCE AND HOMES

As shown in Table II concerning the residence of the two hundred and eighty-eight alumnae reporting, 239, or 82.9 percent, lived in Texas while 49, or 17 percent, lived elsewhere. One hundred and forty-one, or 48.9 percent, lived in towns; six, or 2 percent, lived on ranches; 17, or 5.9 percent, lived on farms; 124, or 43 percent, lived in the city.

Home ownership was indicated for two hundred and thirteen, or 73.9 percent, of the group.

In the study of later alumnae by Adair only 44.4 percent,

of the graduates of 1915 to 1939 owned their homes while in the group from 1915 to 1929, 59 percent, owned their homes.

TABLE II
RESIDENCE AND HOMES

Year	No re- port	Residence		Type of Community				Home Owner- ship
		Texas	Else- where	Town	Ranch	Farm	City	
1905	3	1	2	1	1	1	1	3
1906	8	7	1	4	1	0	3	8
1907	12	10	2	6	0	1	5	10
1908	7	6	1	5	0	1	1	5
1909	17	11	6	3	0	2	12	13
1910	2	1	1	1	0	0	1	2
1911	7	7	0	4	1	0	2	6
1912	12	12	0	5	0	0	7	6
1913	15	15	0	6	0	1	8	12
1914	18	15	3	8	1	0	9	13
1915	27	16	11	13	1	1	12	19
1916	25	20	5	12	0	3	10	22
1917	36	32	4	18	0	3	15	26
1918	36	31	5	20	0	1	15	29
1919	32	30	2	18	1	3	10	22
1920	31	25	6	17	0	0	14	17
Total	288	239	49	141	6	17	124	213
Percent		82.98	17.01	48.9	2.08	5.90	43.06	73.9

Texas is still the residence of the greatest number of

the early alumnae; a very small number were living elsewhere.

A predominating proportion, 91.96 percent, lived in towns and cities while only 7.98 percent lived on farms or ranches.

In a comparison of home ownership, the percentages for all groups were high, as is indicated in United States to be 46.8 percent.¹

The exact information regarding the number of these early graduates who came from farms is not available. A recent study, however, showed that approximately 31 percent, of the students at the Texas State College for Women came from farms and ranches.²

MARITAL STATUS

Sixteen years after attendance at the Texas State College for Women, of the two hundred and eighty-eight alumnae, 196, or 68 percent, were married; 3, or 1 percent, were divorced; 24, or 8.33 percent, were widowed; 65, or 22.5 percent, were single.

A similar study made by Adair over a later period shows that among the graduates of twenty-four years, 1915 to 1939, there were 43.5 percent, single; 53 percent married; 1.7 percent, widowed; 1.7 percent divorced; and from an earlier period, 1915 to 1929, there were 28.3 percent, single; 66.4 percent, married; 2.8 percent, widowed; 2.5 percent divorced.

¹Howard F. Bigelow, Family Finance (Chicago: J. B. Lippincott Co., 1936), p. 20.

²Myrtle Dickie Negy, "A Study of Home Environments of Homemaking Students of Texas State College for Women," Unpublished Master's Thesis, Graduate Division, Department of Home Economics, Texas State College for Women, 1939, p. 31.

TABLE III
MARITAL STATUS

Year	No. Reporting	Married	Divorced	Widow	Single
1905	3	2	0	1	0
1906	8	5	0	1	2
1907	12	8	0	3	1
1908	7	7	0	0	0
1909	17	13	0	0	4
1910	2	2	0	0	0
1911	7	4	0	1	2
1912	12	6	0	0	6
1913	15	11	1	2	1
1914	18	13	0	1	4
1915	27	18	0	1	8
1916	25	20	0	1	4
1917	36	21	1	6	8
1918	36	26	0	3	7
1919	32	22	0	1	9
1920	31	18	1	3	9
Total	288	196	3	24	65
Percent		68	1	8.33	22.5

In the present study, there was a slightly larger percent married and a smaller percent divorced than in either of the groups surveyed by Adair.

HIGHER EDUCATION LEADING TOWARDS DEGREES

Of the two hundred and eighty-eight alumnae graduates who had received diplomas, 161, or 65.89 percent, have gone on and received bachelor's degrees; of this number, 140, or 48.6 percent, returned to Texas State College for Women for the advanced work, while 21, or 7.29 percent, took bachelor's degrees elsewhere. Of those receiving bachelor's degrees, 54 continued their education to the master's degree. Of these, 11, or 3.81 percent of the entire group, were from Texas State College for Women; 43, or 14.93 percent, received their master's degrees elsewhere. Of these 288 alumnae, 1 received the degree of Doctor of Philosophy.

Of the two hundred and eighty-eight alumnae in this study there were 47 who were granted the two years college diplomas. Thirteen of these finished the work leading to bachelor's degrees of which eight were granted at the Texas State College for Women. Eight completed work for master's degrees; and of these, one was granted at the Texas State College for Women.

TABLE IV
HIGHER EDUCATION LEADING TOWARDS DEGREES

Year	Texas State College for Women				Elsewhere		
	Diploma		Bach- elors	Masters	Bach- elors	Masters	Ph. D.
	2 Yrs.	3 Yrs.

Total	47	241	140	11	21	43	1
Percent			48.6	3.81	7.29	14.93	.34

Out of the forty-seven graduate alumnae, eight completed work for the bachelor's degree from the Texas State College for Women, five elsewhere due perhaps to the fact that bachelor's

degrees were not offered in the Texas State College for Women until 1915.

One hundred and fifty-one, or 52.41 percent, received their bachelor's and master's degrees from the Texas State College for Women. Sixty-four, or 22.12 percent, received their bachelor's and master's degrees elsewhere. That there were forty-three master's degrees received elsewhere and only eleven from the Texas State College for Women may be due to the fact that the first master's degrees were not granted from the Texas State College for Women until 1931.

OCCUPATIONS IN 1940

Of these two hundred and eighty-eight alumnae in 1940, 160, or 62.7 percent, were homemakers; 69, or 27.7 percent, were teachers; 28, or 10.2 percent, were following other occupations. Thirty-one, or approximately 10.7 percent, were homemakers and, in addition, were engaged in some other occupation.

Besides homemaking and teaching, there were sixteen other occupations in which these alumnae graduates were engaged at the time of this study. For the thirty-one homemakers who were combining homemaking with another occupation, ten different occupations were represented. The most frequent combination with homemaking was teaching; in fact, approximately more than half of the employed homemakers were engaged in this work.

The next most frequent combination was the homemaker and an assistant to husband in business. Types of work in which women were assisting their husbands were as follows:

Husband's Occupation	Wife's Position
Dentist.....	Dentist Assistant
Manufacturing Business of Commercial Refrigerators.....	Husband's Secretary
Manager of Yacht Club.....	Assistant Manager of Yacht Club
Owner of Retail Lumber Yard.....	Assistant in Office and Supervise Building of Homes.

OCCUPATIONS HELD BY MARRIED ALUMNAE SINCE GRADUATION

One hundred and ninety-seven, or 87.5 percent, worked before marriage while 28, or 12.4 percent, were not employed. Ninety-seven, or 43.1 percent, worked after marriage; 128, or 56.8 percent, followed no occupations after marriage.

Of the one hundred and ninety-seven who worked before marriage, 174 were teachers and ten were in some field of home economics other than teaching. After marriage seventy-three were in the field of teaching; eleven were in some type of home economics work other than teaching.

Besides teachers and other home economics workers, the alumnae graduates were engaged in seven different vocations before marriage, while after marriage they held positions in eight different vocations.

Vocations before Marriage	Vocations after Marriage
Assistant Postmistress	Manager of Gift Shop
Secretarial Work	Manager of Apartment House
News Reporter	Librarian
Librarian	Assistants to Husbands
Insurance Agent	County Treasurer
Nurse	Insurance
Assistant County Treasurer	Secretary
	Postmistress

ORGANIZATION MEMBERSHIPS

Five hundred and forty-eight memberships in organizations were listed by the two hundred and eighty-eight graduate alumnae. These may be classified under seven types as shown in Table VII; thirty-seven various clubs or organizations were represented in these seven groups.

Seven clubs appeared to be civic in nature; five, study; five, social; eighteen, professional; one, church; and one, Texas State College for Women, ex-students.

In the civic group, the Red Cross had the greatest number of members from the ex-students group. The American Legion Auxiliary was second while the Y. W. C. A. and Garden

Clubs, which contained the same number of members from the group, ranked third.

Among the study clubs, Table VII indicates that the greatest number of memberships was held in Parent Teachers' work with the American Association of University of Women, second; and federated clubs, third.

Eastern Star was the most popular among the social organizations. The Daughters of American Revolution was second while bridge clubs ranked third.

The professional organizations represented, in the frequency mentioned, were as follows:

1. Texas State Teachers Association
2. National Education Association
3. Delta Kappa Gamma
4. Texas Home Economics Associations
5. Business and Professional Club

The two hundred eighty-eight graduate alumnae with an average of almost two memberships each are filling very important places in community activities in which they are living. The graduate alumnae are interested in the more serious and purposeful types of clubs and organizations. This is clearly shown in Table VII.

It has always been the purpose of the College to develop leadership among the students. The graduate alumnae have not failed the College, for they are making wide contributions, not only in local but state and national organizations in which they hold memberships.

OFFICES HELD IN LOCAL, STATE AND NATIONAL ORGANIZATIONS

There were four hundred and eighteen offices held by 193, or 67 percent, of the two hundred and eighty-eight graduate alumnae. Ninety-five, or 32.9 percent, held no office at the time of answering the questionnaires. Thirty-one, or 7.4 percent, held local offices in civic organizations; 182, or 43.3 percent, held local offices in study groups; 51, or 12.3 percent, held offices in professional clubs; 58, or 13.8 percent, in social; 68, or 16.2 percent, in church; 28, or 6.7 percent, in the ex-students chapters of the Texas State College for Women.

Fifty state organization offices were held by 43, or 14.9 percent of graduate alumnae students. Four, or 1.3 percent, held state offices in civic clubs; 19, or 6.5 percent, in study clubs; 17, or 5.9 percent, in professional organizations; 2, or

0.6 percent, in social groups; 1, or 0.3 percent, in state wide church organizations; 7, or 2.4 percent, held state offices in the ex-students chapter of the Texas State College for Women.

Four, or 1.3 percent of graduate alumnae, held five offices in national organizations. One held national offices in study clubs while three held four national offices in professional organizations.

Four hundred and seventy-three offices in local, state, and national organizations were held by one hundred and ninety-three of the two hundred and eighty-eight graduate alumnae.

Forty-three of the two hundred and eighty-eight graduate alumnae held offices in fifty state organizations. Study clubs ranked first as to the number of offices held, with professional second; Texas State College for Women Ex-Student Chapters, third; civic, fourth; social, fifth, and church, sixth.

Four of the two hundred and eighty-eight graduate alumnae held five offices in organizations. Professional clubs were first with study clubs second.

HONORS RECEIVED

The honors listed by the group are summarized in Table IX.

Year	
1919	Vice-President of Delphian Chapter.
	(7) Worthy Matron of Order of Eastern Star.
	(1) Gold pin for recognition of 4H leadership work.
	(2) Library Board.
	Chairman of the Children's Story Hour for two seasons.
	(3) Co-author of college bulletin.
	(4) Second vice-president of Texas State College for Women Association.
	(5) Who's Who in American Women Volume III.
	Who's Who in American Educators.
	Who's Who American Men of Science.
	International Blue Book (Scientists).
	Documented in World Archives of Women.
1920	(6) Selected as one of the twenty-five most notable graduates of Texas State College for Women on its twenty-fifth anniversary.
	Alpha Mu Gamma (honorary international foreign language fraternity).
	Member of Standardization Committee of Arizona Home Economics Association.
	(1) Associate Judge of Election Voting.
	(2) Delta Kappa Gamma.
	Treasurer and Vice-President of Texas State College for Women Ex-Students.
	(3) Delta Kappa Gamma.
	(4) Charter member of Delta Kappa Gamma.

CHURCH AFFILIATIONS

Of the two hundred and eighty-eight alumnae graduates included in this study, 63, or 21.8 percent, were members of the Baptist Church; 61, or 21.1 percent, the Presbyterian Church; 102, or 35.4 percent, the Methodist Church; 3, or 1 percent, the Community Church; 19, or 16.5 percent, the First Christian Church; 12, or 41.1 percent, the Episcopal Church; 4, or 1.3 percent, the Church of Christ; 2, or 0.67 percent, the Jewish Church; and 1, or 0.3 percent, the Christian Science Church.

Twenty-one, or 7.3 percent, did not state church preference or affiliations.

Total	188	100	98	7	62	23	22
Percent	65.2	34.7	34	2.4	21.5	7.9	7.3

One hundred and eighty-eight of the two hundred and eighty-eight, or 65.2 percent, of the alumnae traveled to the extent of over two-thirds of the United States while 100, or 34.7 percent, traveled over less than one-third of the United States.

Two hundred and twelve, or 73.1 percent, of the graduate alumnae, traveled outside of the United States, or into foreign countries. Of this number, 98, or 34 percent, traveled in Mexico; 7, or 2.4 percent, in Alaska; 62, or 21.5 percent, in Canada; 23, or 7.9 percent, in Europe while 22, or 7.3 percent, traveled elsewhere.

Travel other than indicated above included the following: Cuba, Hawaii, Japan, China, Carribean Cruize, Puerto Rico, San Juan, Havana, Costa Rica, Jamica, Egypt, Nassau, Syria, Bermuda, Palestine, Canal Zone, South America (Brazil and Venezuela), Africa, Phillipines, and a trip around the world.

DATA REGARDING FAMILY

Of the two hundred and eighty-eight alumnae graduates, as shown in Table XII, there were three hundred and eight children. Fifty-one, or 14.2 percent, of the graduate alumnae had no children. Of the children, one hundred and ninety-five, or 51.32 percent, were boys; 185, or 48.68 percent, were girls. The average per family was 1.3 child. In 1930 the average size of the family in the United States was 4 persons.¹

¹Howard Bigelow, Family Finance (Chicago: J. B. Lippincott Co., 1936), p. 7.

One hundred and seventy-one, or 45 percent, of the three hundred and eighty children were graduated from high schools; seventy-seven, or 45.03 percent, of the 171 high school graduates went to college. The estimated number of freshmen in institutions of higher education in Texas in 1931 to 1937 was 36.78 percent of the high school graduates.¹

Eighty-two, or 47.95 percent of the 195 boys and 89, or 52.05 percent, of the girls were graduated from high school.

Thirty-eight, or 49.35 percent, of the 89 girls attended the Texas State College for Women. Twenty-five, or 32.47 percent, attended colleges or universities elsewhere in Texas, and 14, or 18.18 percent, studied elsewhere.

Eighteen, or 58.06 percent, of the girls who attended the Texas State College for Women received their degrees, while 7, or 22.58 percent, were granted degrees from another school in Texas, and 6, or 19.36 percent, completed degree work outside of Texas.

	1.3 child per family				45% of 380 graduated from H.S.			45.03% of 171 H.S. graduates went to Col.				40.26% of the 77 girls who attended college received degrees			

Thirty-one, or 40.26 percent, of the 77 girls who attended college received their bachelor's degrees. Of the thirty-eight girls who attended the Texas State College for Women, 18 or 58.06 percent, received their degrees. Of the thirty-nine girls who attended other institutions of higher learning in Texas or elsewhere, thirteen, or 41.94 percent, were granted degrees by 1940.

CHAPTER III

SUMMARY

The object of this study was to assemble facts about the early graduates of the Texas State College for Women, and to ascertain their progress in as many ways as possible. To this end a questionnaire was formulated and sent to seven hundred and forty-two graduate alumnae prior to 1921.

The Texas State College for Women was established at Denton, Texas, by the legislature in 1901. The first regular session opened on September 23, 1903, with an enrollment of one hundred and eighty-six and a faculty of fourteen members, while in 1920 the enrollment was eleven hundred and fifty-six, with a faculty of one hundred and ten members. The present survey is concerned with the graduates of this period.

In the early years of the College, 1904 to 1909, the credentials granted were based on two years of general college work. These diplomas were not granted after 1909. Beginning in 1910, and continuing up to and including 1920, the College granted three-year diplomas. In 1920, the issuance of these diplomas was discontinued. The College added to its curricula a fourth year of standard college work in 1914 to 1915. The first baccalaureate degrees were granted in 1915. There were three graduates.

One hundred and fifty-six, two-year diplomas and eight hundred and thirty, three-year diplomas, were granted from the College from 1904 to 1921.

This study is limited to those alumnae who received either the two or three year diploma.

From the seven hundred and forty-two questionnaires sent out, two hundred and eighty-eight, or 29.25 percent, were returned in usable form.

Of the two hundred and eighty-eight graduate alumnae reporting, 82.98 percent lived in Texas; 17.01 percent, lived elsewhere. Forty-eight and nine tenths percent were in towns, 2.08 percent on ranches, 5.90 percent on farms, and 43.06 percent in the city. Seventy-three percent owned their homes.

Sixty-eight percent of the graduate alumnae were married; 1 percent was divorced; 8.33 percent were widows; and 22.5 percent were single.

Forty-eight and six tenths percent have received bachelor's degrees, and 3.81 percent have been granted master's degrees from the Texas State College for Women.

Seven and twenty-nine hundredths percent have been granted bachelor's degrees and 14.93 percent master's degrees elsewhere. One has received the degree of Doctor of Philosophy.

Sixty-two and seven tenths percent of the graduate alumnae were engaged in homemaking; 27.7 percent were teaching; 10.2 percent were engaged in other occupations while 10.7 percent were engaged in homemaking and in other occupations.

Eighty-seven and five tenths percent worked before marriage; 12.4 percent were not employed. Forty-three and one tenths percent worked after marriage while 56.8 percent followed no occupations.

The graduate alumnae held five hundred and forty-eight memberships in six various organizations or clubs. The organizations in order of frequency of memberships were as follows:

1. Study Clubs
2. Professional Clubs
3. Church Organizations
4. Social Clubs
5. Civic Organizations
6. Texas State College for Women Ex-Students Chapters

Only thirty-two and nine tenths percent held no offices in local organizations. Sixty-seven percent held local offices; of these, 7.4 percent held local offices in civic organizations, 43.3 percent in study clubs, 12.2 percent in professional clubs, 13.8 percent in social clubs, 16.2 percent in church organizations, and 6.7 percent in the Texas State College for Women Ex-Students Chapters.

Fourteen and nine tenths percent held state offices while 1.3 percent held national offices in the various organizations and clubs.

Twenty-three and sixty-one hundredths percent of the two hundred and eighty-eight graduate alumnae have received one or more honors. It would be impossible to give here a resume of honors received. (See Table IX pages 36-41)

Ninety-two and six tenths percent were members of various churches. Seven and three tenths percent did not state church preferences or affiliations.

Sixty-five and two tenths percent traveled extensively; 34.7 percent, travel was limited; 73.1 percent traveled outside of the United States or into foreign countries.

The two hundred and eighty-eight graduate alumnae had three hundred and eighty children. Fifty-one and thirty-two hundredths percent were boys while 48.68 percent were girls. Fourteen and two percent had no children.

Forty-five percent of the children of the graduate alumnae were graduated from high school; 45.03 percent of the high school graduates went to college; 49.35 percent of the daughters attended Texas State College for Women, while 32.47 percent attended colleges or universities elsewhere in Texas, and 18.18 percent studied in out-of-state schools.

Fifty-eight and six hundredths percent of the girls who attended the Texas State College for Women received their degrees, while 22.58 percent were granted degrees from other schools in Texas, and 19.36 percent completed degree work out of Texas.

From this study, the reader has been shown that the graduate alumnae of the Texas State College for Women are not only outstanding but are contributing much to the building of the communities in which they are living.

Many of these graduate alumnae are still living in Texas and own their homes. Over half of these graduate alumnae are married, and only a very few divorces were recorded.

A large percent have continued their education and have

been granted bachelor's degrees from the Texas State College for Women. A small number have also received their master's degrees from this College.

Homemaking was the chief occupation of this group with teaching second. A large percent worked before marriage and approximately one half have worked or have continued to work in the professional field for a time, at least, after marriage.

These graduate alumnae are filling important places in clubs and civic work and have received many honors. A large majority are affiliated with church activities.

They have traveled extensively in and out of the United States. The average family of the graduate alumnae includes two children. One half of these children have received a high school education, and one half of those having graduated from high schools have attended or are attending college. Of the daughters attending college, one half have or are attending the Texas State College for Women.

The spirit, the real and enduring quality of any College, is listed and proven by the daily living and the achievements of its outgoing students, and graduates. And the strongest force in ultimately determining the destiny of the Texas State College for Women rests in the hands of the thousands of Texas Women who call her 'Alma Mater,' and in the hands of the thousands of others who in the future will have the same high privilege."¹

APPENDIX

Galveston, Texas

Dear Fellow Alumna:

It is my desire to greet you as a former associate of C.I.A. and to felicitate ourselves on having shared these high advantages and the liberalizing influence of college life.

Now, my purpose is not entirely unselfish. But no! Wait a moment before you throw this into the scrap basket. I am not going to ask you for a contribution to this or that cause or an advance to the missionary society, or invalided charity seeker, or dues.

The enclosed questionnaire tells the story. In order to make an advance to a degree, it is necessary that I write a thesis, and this thesis has to be based on the questionnaires which I am sending out to each alumna.

Naturally, academic treatment is free from personal allusions. Nothing of a private nature concerning my associates will be disclosed in connection with any name. Curiosity seeking is not the motive. What I desire to prove by the thesis is the worthwhileness of an education of higher type as based on the records sent in to my files. From these records, tables and classified data will be drawn up and certain conclusions of a general nature derived. In effect, the results will be a composite portrait of the college alumna some years after graduation, presented objectively.

Your consideration of my request is anticipated with my cordial appreciation.

Very sincerely yours,

Charlotte Cornell
